EDUCATION

National Institute of Technology Andhra Pradesh

B.Tech in Electronics and Communication Engineering

2020 – 2024

CGPA: 8.18

National Institute of Technology Andhra Pradesh

Minor Degree in Software Engineering

2021 – 2024

Grade: A

TECHNICAL SKILLS

Languages: C#, Java, Go, Python

Frontend: Angular (v10+), RxJS, HTML, SCSS

Backend: ASP.NET Core, Spring Boot, REST APIs

Auth & Security: JWT, OAuth2, RBAC

Databases: PostgreSQL, SQL Server, Redis, MongoDB

Tools: Docker, Git, Azure, RabbitMQ

Concepts: Data Structures & Algorithms, System Design, Concurrency

EXPERIENCE

TCS – AIG | Full Stack Developer

Aug 2024 – Present

Angular 14, .NET Core, SQL Server, Redis

- Designed and developed a scalable internal web application using **.NET 8** and **Angular 14**, supporting critical business workflows for internal users.
- Implemented secure authentication and authorization using **JWT** and **role-based access control (RBAC)** across multiple user roles.
- Optimized search performance using **Redis caching** for search text data (applications, technologies, services), achieving over **60% response time improvement** via **cache stampede prevention** and effective **cache eviction strategies**.
- Built an event-driven notification mechanism using **RabbitMQ** to publish and process **data quality errors**, enabling near real-time alerts to application owners.
- Developed an optimized **global search feature** using **RxJS (debounceTime, switchMap)** to efficiently query and filter large datasets.
- Implemented a high-performance **CSV export feature** capable of handling thousands of records with file generation latency under **100ms**.
- Designed and optimized RESTful APIs using **ASP.NET Core** and **Entity Framework Core**, following clean architecture and performance best practices.
- Created interactive **KPI dashboards** using **ApexCharts** to visualize application data by state, business unit, and classification.
- Collaborated with QA, product owners, and stakeholders in **Agile sprints** to deliver features, resolve production issues, and support releases.

PROJECTS

Bed & Breakfast Booking System

GitHub

- Developed a booking system using **Go (Golang)** and **PostgreSQL**.
- Implemented **JWT-based authentication** and role-based access control.
- Used **Goroutines** to handle concurrent booking requests safely.
- Containerized the application using **Docker**.

ACHIEVEMENTS

- Solved **3000+** Data Structures & Algorithms problems.
- Global Rank **151** in CodeChef Starters 105 (Div 3).
- LeetCode Knight (Top **5%**).
- CodeChef **1606** | Codeforces **1447** | LeetCode **1909**.

CODING PROFILES

LeetCode: Nagendra2002 | **Codeforces:** Nagendravarma | **CodeChef:** Nagendra9202230
